Dynamic radio-field optimization from Active Radio Control

The LANCOM LN-830U supports the Wi-Fi optimizing LANCOM Active Radio Control. This intelligent combination of innovative features in the LCOS operating system—including Adaptive Noise Immunity, Adaptive RF Optimization, Airtime Fairness and Client Management—sustainably improves Wi-Fi performance and supports administrators with professional tools for Wi-Fi management.

High-performance Wi-Fi diagnosis with Spectral Scan

The Spectral Scan function enables the LANCOM LN-830U to search its radio field for interference sources, so providing a professional tool for efficient Wi-Fi troubleshooting. By scanning the entire frequency spectrum, sources of interference in the radio field can be identified and displayed graphically.

High-performance Wi-Fi diagnosis with Spectral Scan

With numerous integrated security features such as IEEE 802.1X, this access point provides optimal security for networks. Administrators and employees alike benefit from professional security policies on the network.

Zero-touch deployment

The LANCOM LN-830U can be versatilely operated: Managed via the LANCOM Management Cloud it is integrated into a comprehensive, automated network orchestration, based on Software-defined Networking technology. It can also be operated via a LANCOM WLAN controller or be applied in stand-alone operation.

Secure integration of external users

In combination with the LANCOM Public Spot Option, the LANCOM LN-830U is ideal for operating hotspots. Users benefit from a hotspot that is secure and easy-to-use, while hotspot operators can be sure that their own network remains separate from the hotspot.

Maximum future viability

The LANCOM LN-830U supports what is currently the fastest WLAN standard, so that customers are well prepared for future challenges. What's more, LANCOM products are designed for a service life of several years and are equipped with hardware dimensioned for the future. Even reaching back to older product generations, updates to the LANCOM Operating System—LCOS—are available several times a year, free of charge and offering major features.
